

RAJARIKAM ASHISH

Hyderabad, India | +91 9989813126 | rajarikam117@gmail.com | [linkedin.com](https://www.linkedin.com) | github.com/ashish

PROFESSIONAL SUMMARY

Full Stack Web Developer and B. Tech CSE (AI & ML) student with hands-on experience building React.js, Node.js, and Java Spring Boot applications integrated with LLM APIs. Proven track record of shipping production-ready web applications end-to-end, from UI design to Vercel deployment. Proficient in REST API development, SQL/NoSQL databases, and agile team collaboration. Passionate about solving real-world problems with clean, maintainable code.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), Java, Python, HTML5, CSS3, SQL
Frontend: React.js, Tailwind CSS, Responsive Design, Progressive Web Apps (PWA)
Backend & APIs: Node.js, Java Spring Boot, REST APIs, JDBC, Express.js
Databases: MySQL, PostgreSQL, MongoDB, NoSQL
AI & LLM Integration: Anthropic Claude API, Groq LLaMA, Tavily Search API
Tools & Deployment: Git, GitHub, Vercel, Chrome Extension Development, Agile/Scrum

PROJECTS

FinSathi — AI-Powered Personal Finance Platform 2026

Tech Stack: React.js, Node.js, Groq LLaMA API, Tailwind CSS, Vercel

- Built an AI-powered personal finance web application targeting Indian users, supporting EPF, PPF, NPS, and SIP instruments.
- Integrated LLM-driven financial advisory features providing personalized investment recommendations.
- Led the project from ideation to production deployment on Vercel; presented at VNR DESIGN-A-THON 2026.
- Implemented RESTful API layer and responsive React.js frontend with Tailwind CSS.

TruthLens — AI Fake News Detector + Chrome Extension 2025–2026

Tech Stack: React.js, Groq LLaMA API, Tavily Live Search API, Chrome Extension API

- Developed a real-time AI fact-checking web application that cross-references news articles against live search results.
- Packaged the application as a Chrome Extension for in-browser fact verification on any web page.
- Integrated Tavily live search API for current event lookup and Groq LLaMA for AI analysis.

CHRONO — AI Schedule Optimizer (PWA) 2025

Tech Stack: React.js, Claude API, Tailwind CSS, PWA, Vercel

- Built a Progressive Web App that uses AI to intelligently plan and optimize daily schedules.
- Implemented offline support and installable PWA capabilities for mobile and desktop users.

SmartLA — Smart Lexical Analyzer with Intelligent Error Handling 2025–2026

Tech Stack: HTML5, CSS3, JavaScript, Groq API, Compiler Design

- Developed a single-file web application performing lexical analysis for C, Java, and Python source code.
- Implemented intelligent error classification with plain-English fix suggestions via Groq API integration.
- Team project with 3 members under faculty guidance; delivered complete technical documentation.

EDUCATION

B. Tech — Computer Science and Engineering (AI & ML) Expected 2028

Vignan Institute of Technology and Science, Hyderabad, India

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Theory of Computation, Compiler Design, Object-Oriented Programming (Java), Web Technologies

ACHIEVEMENTS & ACTIVITIES

- Presented FinSathi at VNR DESIGN-A-THON 2026 — AI finance platform built and deployed within the competition timeline.
- Maintained consistent GitHub contribution streak by documenting Java OOP learnings and project work publicly.
- Built and deployed 4 full stack web applications using React.js, Node.js, and LLM APIs within one academic year.
- Completed Java full-stack curriculum covering OOP, Collections, JDBC, File I/O, and thread synchronization.
